

4-input 1-output photovoltaic combiner box price

What is a photovoltaic combiner box?

In a photovoltaic power system, the combiner box is a wiring device that ensures the orderly connection and confluence function of photovoltaic modules. It allows the user to connect a certain number of photovoltaic cells with the same specifications in series to form a photovoltaic series.

Are all wires pre-wired in a solar combiner box?

All wires are pre-wired in the box. Our solar combiner box is used professional wires that are especially for solar system. Built-in with a ground wire connector, the ground wire installation is available. Please ensure the current and voltage of single PV array doesn't exceed 10A/250VDC. Then you can connect solar panel to the combiner box.

What are the advantages of solar combiner box?

A solar combiner box offers current-attack, over current protection, and over-voltage protection. It has a maximum open circuit voltage of 1000V and comes with high voltage lightning protection device protection. Using a combiner box is recommended for several reasons.

What is the maximum current of a single PV input array?

Max current of single PV input array is 10A. Their function is over load protection. The Combiner Box protects PV solar panel and inverter. Besides it will reduce the length of cable connect from panel to inverter, optimize system instruction makes the system more useful and maintenance. All in all.

What is the function of a Solar Combiner Box?

The Solar Combiner Box functions to connect the solar panels into a box. Each wire is connected to a fuse terminal; the output of the fuse terminals is combined into a cable connected to the inverter box. The box consolidates the amounts of cables running into the inverter.

What is a 4 PCs air circuit breaker?

4pcs individual 15A rated fuse. Max current of single PV input array is 10A. Their function is over load protection. It can provide short circuit fault protection and controls the combiner box output. Professional low voltage Air Circuit Breaker controls output, with anti-circuit protection function which makes the system more reliable and safety.

Electrical Parameter: System maximum DC voltage - 1000VDC; Fuse holder - 25A 1000VDC; Maximum input current for each string - 15A; Maximum input string - 4

Which makes your solar panel system work reliably and safety. With multifunction: PV array input with first class combination, Quickly cut off circuit, anti-thunder protection, anti-reverse, ...
