

Charging pile energy storage cabinet installation cost

Where should a charging pile be installed?

For public places such as public parking lots, public charging stations, shopping malls, and theaters, it is more convenient to install DC charging piles. When it comes to home charging piles, considering the cost, most of the charging piles for household cars are AC piles.

How much does a charging pile cost?

The price of a charging pile can range from hundreds to thousands of RMB, with the main difference being in power. The cost of a 11KW charging pile is around 3000 RMB or more, a 7KW charging pile costs between 1500-2500 RMB, and a portable 3.5KW charging pile is priced under 1500 RMB.

What are charging piles for new energy vehicles?

As one of the new infrastructures, charging piles for new energy vehicles are different from the traditional charging piles. The "new" here means new digital technology which is an organic integration between charging piles and communication, cloud computing, intelligent power grid and IoV technology.

How does a charging pile display function?

The charging pile display allows users to perform corresponding charging methods, charging time, and cost data printing by swiping a specific charging card on the HMI interface. It can display data such as charging amount, cost, and charging time.

How many watts can a charging pile charge?

The maximum charging power of an AC charging pile is 7KW. The charging power of a DC charging pile is generally 60KW to 80KW. The input current of a single gun on a charging pile can reach 150A--200A. This is a significant demand on the power supply line. In some old communities, even installing one may not be possible.

Why are charging piles important?

Charging piles are of great significance to developing new energy vehicles, and they are also an important part of the emerging digital economy such as intelligent traffic and intelligent energy. The State Grid Corporation of China (SGCC) is taking an active role in the development of new energy vehicles.
