

# Description of the hazards of solar power stations

What are the environmental impacts of solar power?

The potential environmental impacts associated with solar power--land use and habitat loss, water use, and the use of hazardous materials in manufacturing--can vary greatly depending on the technology, which includes two broad categories: photovoltaic (PV) solar cells or concentrating solar thermal plants (CSP).

Are solar energy systems harmful to the environment?

Solar energy technologies require materials, such as metals and glass, that are energy intensive to make. The environmental issues related to producing these materials could be associated with solar energy systems.

What are the environmental effects of PV solar energy?

Compared with fossil-based electrical power system, PV solar energy has significantly lower pollutants and greenhouse gases (GHG) emissions. However, PV solar technology are not free of adverse environmental consequences such as biodiversity and habitat loss, climatic effects, resource consumption, and disposal of massive end-of-life PV panels.

Are concentrating solar power systems hazardous?

Concentrating solar power systems may employ hazardous materials such as oils or molten salts, hydraulic fluids, coolants, and lubricants. Proper planning and good maintenance practices can be used to minimize impacts from these hazardous materials.

What are the dangers of solar panels?

Toxic and carcinogens, heart and liver problems, lung cancer, throat infection, nausea, vomiting, reduced blood cells, dark and red spot on skin, hands and feet etching. Toxic and carcinogenic, kidney, prostate and respiratory system infections, diarrhea, and lung cancer. Coating material in solar panel, screws and solar chassis board.

What are the health and environmental effects of solar PV modules?

Table 11. Safety, Health and Environmental (SHE) impact from the toxic compounds , , , . To produce anti-reflective coatings for solar PV modules. Skin irritation, eyes irritation, throat problem, lungs problems, mouth and stomach burns.
