Games that allow you to hide in lockers

How do you hide a monster?

When the player is close enough to a hiding spot, they are able to hide by interacting with it. Players can also hide by escaping the line of sight of monsters. For example: hiding behind a desk, away from the Navi-Path, inside vents, or in a side room. This does not work for all monsters, as one monster can still find the player.

What happens if a player is hidden in the game?

Once the player is inside a closet or underneath a bed,the game will consider the player hidden. The game will consider the player hidden after entering a hiding spot,even if the animation has not finished playing. This will keep the player safe from A-60,A-120,Rush,Ambush,Screech and Figure.

What is a hiding spot in Minecraft?

Most commonly,hiding spots appear in the form of grey lockers,tables,or blue lockers,provided they are functional. Lockers will usually protect players from any form of harm,unless the entity encountered is specialized in searching lockers or has the ability to render them ineffective.
