What is a home battery storage system?

Home battery storage systems are large, stationary batteries that store energy for later use or during a blackout. While the Tesla Powerwall is the most widely known and installed home battery, the playing field is getting more crowded. Home batteries can charge using grid power or solar power.

What is a home energy storage system?

Most home energy storage systems provide partial backup power during outages. These smaller systems support critical loads, like the refrigerator, internet, and some lights. Whole-home setups allow you to maintain normal energy consumption levels--but at a cost.

How many kWh does a battery backup system store?

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.

Do battery storage systems work during a power outage?

On their own, batteries can keep your home's essentials powered up during an outage, though without a way to charge, a battery may not get you through an extended outage. Paired with solar panels, which can charge a battery throughout the day, home battery storage systems can keep your essentials running through an extended outage.

How much does a home energy storage system cost?

On average, home energy storage systems can cost between \$12,000 and \$20,000, but they may be even more expensive depending on the design, features, and battery you choose. There are battery incentives and rebates available, including the 30% federal tax credit.

Why should you choose a home energy storage system?

With independence from the utility grid, you can avoid the inconvenience of outages without sacrificing your daily routines. Most home energy storage systems provide partial backup power during outages. These smaller systems support critical loads, like the refrigerator, internet, and some lights.
