

How do I choose a home battery storage system?

Let's start with the battery - the muscle behind your home battery storage system. The size of the battery you install depends on your energy needs. A detached house with five people will likely use more energy than a small 1-bedroom flat with two people. Make sure you do your research before choosing a home battery that's right for you.

What is a battery energy storage system (BESS)?

Battery Energy Storage Systems (BESS) are pivotal technologies for sustainable and efficient energy solutions.

Can a home storage battery be charged from the grid?

You can charge your home storage battery from the grid during cheaper off-peak hours. Then, during peak periods, you can discharge when energy is more expensive. This can help reduce your reliance on the grid when energy is more expensive and therefore, cut your bills.

How do I know if my Enphase storage system is connected?

Internet connectivity of your Enphase storage system is essential to ensure that status updates are available for display in Enlighten. In the upper left corner of the app, you can see the operation status of your system and whether your system is connected to the grid or disconnected from the grid.

How do I recharge my solar system?

To facilitate this recharge, turn off all appliances and circuits, and the system will automatically recover when solar production is available. If solar production is available and the batteries do not recover, you can go to page 20 to restart the batteries by cycling the DC switches on Encharge.

What if the Enphase storage equipment fails?

If the Enphase storage equipment fails, contact your support/contact. The Encharge battery is designed for stationary installation only. vehicles and trailers and should not be used in such applications. Risk of equipment damage. During use, storage, transport, or upright (top side up) position.
