

How to write a microgrid proposal report

What is a microgrid report?

This report provides (1) an overview of the microgrid planning, assessment, and design process for DoD installations and (2) is a resource for energy managers, policymakers, contractors, and other stakeholders involved in microgrid projects.

What is a microgrid project?

The primary goal for microgrid projects is to increase the energy resilience and enhance the ability to serve an installation's electrical loads during a contingency situation.

What is a microgrid design guide?

This guide is meant to assist communities - from residents to energy experts to decision makers - in developing a conceptual microgrid design that meets site-specific energy resilience goals.

Where can I find an example of a microgrid project?

Watch "Islanding a Microgrid" for an example of microgrid project execution at a federal campus at energy.gov/eere/femp/articles/islanding-microgrid. Illustration by Brittany Conrad, NREL

Who should submit a microgrid RFP?

The proposals should be from qualified contractors with experience in the design, construction, and commissioning of complex microgrid systems. Numerous qualified organizations can respond to DoD microgrid RFPs, and competition for projects is typically robust.

Can a microgrid project have a positive financial return?

A microgrid project can have a positive financial return, but this requires a unique combination of installation location, financial incentives, and existing infrastructure. Microgrid projects in the DoD typically follow one of three general project implementation pathways.
