Do I need to meter a photovoltaic system?

It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mounting system, the most common in the industry today, will be installed by the homeowner. While metering the system is encouraged, the specification does not address system wiring elements for associated system sensors or monitoring equipment.

What documents should be included in a solar roof plan?

At a minimum, these documents must include specific documentation of dead loads, live loads, wind loads, and, where applicable, snow loads for the existing roof design. These plans will provide important information for the solar designer when the homeowner decides to install a system.

What are the foundation options for OMCO solar?

Foundation options include OMCO-produced driven C posts (preferred), driven I or W posts, and ground screw foundations. Advantages: OMCO Solar's Universal Module Mount rapidly and easily secures modules to the OMCO Origin 1P Tracker with just 2 bolts per module.

What are photovoltaic panels & how do they work?

They are designed for builders constructing single family homes with pitched roofs, which offer adequate access to the attic after construction. It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mounting system, the most common in the industry today, will be installed by the homeowner.

How many kWh does PVWatts produce per year?

PVWatts provides solar radiation data (which can be used in the calculation procedure presented in this report) and specifies an output of 1,365 kWh per year for this example, along with a month-by-month estimate of the estimated electricity production (kWh).

What are the mounting tolerances for Soltec?

Mounting tolerances: Range from 20 to 40 inches. Can be installed on slopes of up to 17%. Installation: Soltec pre-assembles most components, so the installation includes few steps. Locating the parts and pieces needed at each step is quick. All of this results in substantial savings in both time and financial resources.
