

Special circuit breaker for energy storage grid-connected cabinet

What is a solid-state circuit breaker (ABB)?

A technological breakthrough by ABB - a solid-state circuit breaker - will enhance performance of renewable energy solutions, industrial battery storage solutions and so-called edge grids.

What is a photovoltaic grid-connected cabinet?

Photovoltaic grid-connected cabinet is a distribution equipment connecting photovoltaic power station and power grid, and is the total outgoing of photovoltaic power station in the photovoltaic power generation system, and its main role is to act as the dividing point between the photovoltaic power generation system and the power grid.

What is a solid-state circuit breaker?

The solid-state circuit breaker will be around 100 times faster than traditional electro-mechanical breakers. Its speed maximizes the performance of power distribution systems, while maintaining service continuity. The new ABB breaker will also improve safety and protection for people and equipment.

What is a microgrid breaker?

Off grid, microgrid power is balanced between load and generation to save fuel and reduce CO2 emissions. The smart circuit breaker that integrates both standard and advanced microgrid functionalities to meet a broad range on/off grid requirements, improving flexibility and saving costs.

Why should you choose a new ABB breaker?

Its speed maximizes the performance of power distribution systems, while maintaining service continuity. The new ABB breaker will also improve safety and protection for people and equipment. As there is no energy release when the current is interrupted, there is no risk of arc energy exposure.

What is battery energy storage system (BESS)?

The demand for battery systems will grow as the benefits of using them on utility grid networks is realized. Battery Energy Storage Systems (BESS) can store energy from renewable energy sources until it is actually needed, help aging power distribution systems meet growing demands or improve the power quality of the grid.
