

The leader in energy storage systems for microgrids

How can ABB support energy storage & grid stabilization in microgrids?

For energy storage and grid stabilization in microgrids, ABB has developed a range of standardized, modular and scalable systems that provide effective 'plug and play' solutions for all applications. This compact, containerized approach ensures fast and easy transportation, installation and commissioning.

How can a microgrid improve resilience?

Resilience can be improved by ensuring access and storage of various onsite energy sources quickly, efficiently, and safely. As an integral part of a microgrid system, BESS captures energy from different sources, accumulates this energy, and stores it in rechargeable batteries for later use.

Does Schneider Electric have a battery energy storage system?

Schneider Electric, the global leader in digital transformation of energy management and automation, today announced the launch of its latest Battery Energy Storage System (BESS) designed and engineered to be a part of a flexible and scalable architecture.

What is a microgrid & why should you invest in them?

Microgrids are a particularly attractive solution. Microgrids can integrate multiple distributed generation sources including conventional diesel and gas, and/ or renewables such as solar photovoltaic (PV), wind, hydroelectric, tidal and even thermal schemes like combined heat and power (CHP), together with energy storage.

Does Bess work with Schneider electric microgrid systems?

Comprised of battery modules, battery racks, a battery management system, power conversion unit, and controller, BESS has been tested and validated to work as an integral component with Schneider Electric's microgrid systems.

What is a Bess microgrid?

BESS is the foundation for a fully integrated microgrid solution that is driven by Schneider Electric's controls, optimization, electrical distribution, and world-renowned digital and field services. The climate crisis and geopolitical tension means energy security is not guaranteed today.
