

# Universal bracket for solar lights

What is a solar panel mounting bracket?

Refer to section "Installation handover" This solar panel mounting bracket is a robust and versatile galvanised mild steel bracketsuitable for mounting a variety of solar panels between 20W and 150W in size,against a wall or on a post.

How many watts can a solar panel mount?

WindyNation's solar panel Z-Bracket mounting kit makes it easy to mount solar panels. From recreational vehicles (RV's) to boats to cabins or anywhere else where you need a simple yet reliable method to mount solar panels. This kit is suitable for mounting solar panels up to 150-Watt. What is the thickness of the metal?

Do nut & bolts line up in solar panel?

The nuts and bolts don't line up in solar panel. The nut has a winged flange for additional security. Depending on the location of the mounting hole relative to the panel frame,that may need to be shaved. Helpful?

Will brackets fit a slim panel?

These brackets can be made to fitthe slim panel if you drill out the panel mounting holes to 5/16" thus potentially violating the panel warranty. There will be very little clearance between the bottom of the bolt and the back of qthe panel.

How thick are the brackets?

The brackets are 0.085"thick How do these bolt to the panel? Do they bolt to the underside of the panel? I am thinking I would do better with a clip style over the edge of a panel and only bolts to the roof. Yes,they bolt to the underside of the panels frame and then to the surface where the panel will be mounted Is steel or aluminium
